

```
items = ["saving", "credit", "current" ]

items[0]

'saving'

items[1] = "cheque"

items

['saving', 'cheque', 'current']

items.append("credit cards")

items

['saving', 'cheque', 'current', 'credit cards']

items.insert(2, "debit cards")
items

['saving', 'cheque', 'debit cards', 'current', 'credit cards']

stress = ["cibil", "score", "history"]

report = items + stress
report

['saving',
 'cheque',
 'debit cards',
 'current',
 'credit cards',
 'cibil',
 'score',
 'history']
```

You cannot add a string or a number to a list

You can add two lists

"cheque" in items

```
True
```

```
"cheque" in stress
```

```
False
```

```
"cheque" in report
```

```
True
```
